DIRECTION FOR USE

GENERAL USE – ANY TYPES OF HARD SURFACES

TO DISINFECT: For use on hard nonporous surfaces. Spray to thoroughly wet the surface to be disinfected. Spot test to check compatibility with the surface. Surfaces must remain wet for 1 minute to kill viruses*, 2 minutes to kill bacteria, 3 minutes to kill fungi and M.bovis BCG (TB), and to disinfect *Norovirus, let stand for 4 minutes. Allow to air dry. If desired, wipe dry. No rinse required, even on food contact surfaces. Food must be removed or carefully protected prior to using this product.

TO SANITIZE: Spray to thoroughly wet the surface to be sanitized. Food must be removed or carefully protected prior to using this product. No rinsing required.

Hard nonporous surfaces must remain wet for 30 seconds.

Soft surfaces must remain wet for 2 minutes.

Precleaned food-contact surfaces must remain wet for 60 seconds.

TO CLEAN, DEODORIZE & REMOVE

ALLERGENS: Spray the product on surface and wipe clean. To remove heavy soil let stand a few minutes and wipe clean. For soft surfaces; spray to wet surface and wipe or blot to clean. This product removes the most common allergens.

TO CLEAN VIA FOGGING: This product can be applied effectively with a ULV fogger as a supplement to normal cleaning procedures on restoration and remediation projects in confined, vacant areas of schools, healthcare facilities, and in HVAC systems as well other vacant, indoor areas Note: These use directions are for cleaning only.
