ECO-FRIENDLY

BOTANICALLY-DERIVED ACTIVE INGREDIENT: THYMOL

BIODEGRADABLE
In less than 14 days

NO FIELD CONTAMINATION

SAFER & CONVENIENT

NON-IRRITANT, NON-TOXIC

NON-CORROSIVE

COST EFFECTIVE

COMPATIBLE WITH BIODIGESTORS

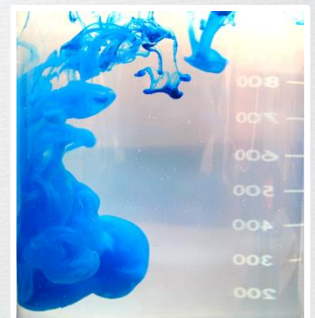

**NO MIXING REQUIRED
DISSOLVES RAPIDLY**

20, 200 AND 1000 L

Dilution: 1:100 in water

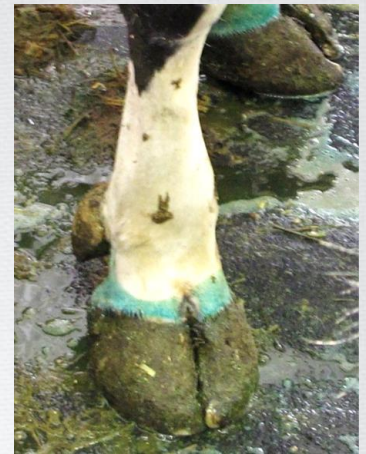

- ✓ Footbath
- ✓ Spray
- ✓ Hoof-wash system

THYMOX[®] FOOTBATH

THYMOX[®] IS PROVEN TO KILL HOOF PATHOGENS, WHILE NOT IRRITATING SKIN

- Adopt the THYMOX[®] 2 STEP FOOTBATH PROGRAM* and see the results!
- Break the cycle of diseases like digital dermatitis (DD) hidden in your herd

DIGITAL DERMATITIS

The most problematic hoof infection, digital dermatitis, causes major economic losses. The disease can cycle back and forth from active lesions to chronic hidden lesions. Chronic DD lesions are too often ignored,

but did you know these lesions are ticking time bombs that can revert to painful warts? THYMOX[®] is designed to help prevent DD lesions and break the vicious cycle:

Healthy skin as a result of good intervention and the use of the non-irritant footbath solution THYMOX[®]

Digital Dermatitis lesions need to be treated topically to heal

Beware of the misuse of irritant substances, like copper sulfate, that aggravate lesions and contribute in the development of chronic infections

"Before, I was using formaldehyde footbaths to control hoof health but always felt uncomfortable to work with such a harsh chemical, knowing the risks linked to it.

I tried using THYMOX[®] and noticed that the herd hoof health was comparable to what I was previously observing with formaldehyde.

I was impressed with knowing that THYMOX was safe, biodegradable and non-toxic, so it was easy to use THYMOX as my regular footbath solution.

Since I am using THYMOX[®], the lameness prevalence decreased to approximately 5% and I am confident that it can continue to decrease."
